

RAM MISHRA

UI/UX Designer, Product Designer & AI Product Builder

Jaipur, India | Open to Jaipur and remote opportunities

rammishra.design@gmail.com | rammishra.in | linkedin.com/in/ram-mishra | +91 99824 56789

Profile

UI/UX designer with a graphic and visual design background, focused on user flows, interface design and interaction decisions. Contribute to selected app and web design work at Maphood with its founder and engineering team. Independently conceived Riya AI and directed a working staff-review demo, from product scope and interaction rules to AI-assisted implementation.

Experience

Design Lead | Product & Visual Design | Maphood

Jun 2023 - Present | Jaipur | Hybrid | Full-time

- Create campaign and social graphics, print and promotional collateral, icons and visual assets.
- Collaborate with the founder and engineering team on selected app and web UI/UX work, product discussions and design decisions.

Independent UI/UX Product Designer & AI Product Builder

Feb 2024 - Present | Jaipur | Remote

- Define product scope, user flows and human-review boundaries; use Figma and AI-assisted tools to develop reviewable prototypes.
- Review interaction states, navigation and responsive layouts; document working behaviour and implementation limits.

Freelance Graphic Designer and Artist

Jun 2012 - Present | Jaipur

- Deliver digital and print work including branding collateral, social graphics, posters and presentations; manage briefs, revisions and final deliverables.

Earlier roles: Senior Graphic Designer, Vision IAS (Nov 2017 - Dec 2018); Graphic Designer, Be Foundation Advertising (Feb 2016 - Feb 2017).

Selected Project

Riya AI | Human Review Workflow Demo

- Defined catalogue-based jewellery assistance and mandatory staff handoff for discount requests, keeping commercial decisions with people.
- Directed and verified the demo flow: staff review, draft reply, local save and resolution. Published four interaction states and design reasoning; identified premature resolution after a saved acknowledgement as a follow-up improvement.

Public demo uses browser-local sample data. Live WhatsApp delivery and independent user validation remain unverified.
